1. Daesun made the design below with toothpicks. He says that he can take away exactly 4 toothpicks to leave four identical triangles. Draw an X through the toothpicks he should remove.

2. Darra made the line segment pattern below from toothpicks. She says that she can make a picture of two rhombuses by moving two toothpicks and adding one more. Draw an X through the segments to move and draw in the additional segment to make a picture of two rhombuses.
