Data from Surveys

Ms. Chen’s class took a survey on how many minutes it took each student to get to school. The results are below:

12 14 5 22 18 12 12 6 14 18 12 5 11

1. What are the highest and lowest times? ______________________________________

2. Make a line plot to display the data.

3. If the entire class responded to the survey, how many students are in the class? ______________________

4. What information was collected about music? ________________________________

5. Use the line plot above. Which type of CDs did students buy most often?

   A  Alternative   B  Classical   C  Country   D  Rock

6. Write a survey question that might gather the following information. “In one school there are 6 sets of twins, 2 sets of triplets, and one set of quadruplets.”
